Mizoram University

About the Workshop

Creation and dissemination of knowledge through research is one of the core functions of the higher learning institutions. Apart from generating new knowledge, the higher learning institutions, particularly the universities also have the responsibility of training the intellectual manpower required for all sectors of the society. Quality of manpower is the most important factor for producing good quality researches. With the passage of time, research as an activity has not received due attention in our universities. Research is considered as a prerequisite for obtaining the degree only. Lack of adequate infrastructure, resource constraints, lack of motivation coupled with a few other factors do not encourage the meritorious students to take up research as a career option. As a result, the quality of the research conducted in our universities has projected a declining trend. This has raised a concern among the academic community, social thinkers and policy makers. Amongst all other factors, training of the researchers is the most crucial one. At present, in most of the universities, except a few disciplines, there is no adequate provision of training on research methodology. The research students often depend upon the supervisor/guide for even finding a suitable research problem. They also find it difficult to proceed further independently. To improve the situation, there is a need for providing training on research methodology to the young scholars. The present workshop is an endeavor in this direction. Association of Indian Universities AIU has taken an initiative of organizing such kind of workshop on regular basis. The present workshops will focus on the following broad themes.

THEMES

- Identification of Research Gaps and Selection of Problem & Writing Research Proposals
- Quantitative and Qualitative Research Methods in Social Sciences
- Hands on training on Statistical Software like SPSS/SAS/STATA etc.
- Writing Research Proposals/Papers/Reports
- Funding Agencies and their Funding Mechanisms

METHODOLOGY

Lectures and presentations, Field visits, case studies, hands on training and interactions among the participants
