Dear Sh Sanjay Kumar,

Subject: EPWRF India Time Series Database

Greetings from EPW Research Foundation, Mumbai!

The EPW Research Foundation (EPWRF) is a constituent unit of Sameeksha Trust, which also publishes an internationally known social science journal, *Economic and Political Weekly (EPW)*. Since its inception in 1993, the EPWRF has been paying special attention to systematic compilation and dissemination of consistent current and past time series data on various aspects of the Indian economy. In pursuit of this, EPWRF in the last two decades or so has published several database studies like National Accounts Statistics (5 editions so far), Domestic Product of States (2 editions) and Annual Survey of Industries (2002) along with interactive CDs.

Later on, in January 2011 the EPWRF launched an interactive online database, christened as *EPWRF India Time Series (EPWRF ITS)*. The first specialty of this online database is that it provides long and extended time series going back to the early 1950s. Secondly, it is updated on a regular basis. And, thirdly, it has over 25,000 variables capsuled in 14 different modules, covering both real and financial sectors. These modules are built on the core values of 'Timeliness, Accuracy and Completeness'.

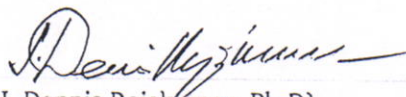

We are also glad to inform you that the *EPWRF ITS* is gaining good acceptance by the research community in India and abroad. Besides, all *Indian Council of Social Science Research (ICSSR)* institutes being its major users, several Universities (central, state and private) and top-ranked management institutes increasingly use our database.

Despite huge administrative and maintenance costs, we have priced each of these data modules nominally. Given the unique features of the online database, we are confident that the academic community at large, working on diverse issues related to Indian economy, can immensely benefit from it.

We request you and your colleagues to visit our website www.epwrf.in and we very much welcome your valuable suggestions in further improving the database.

With kind regards,

S/K
