The basic core of evolution survival, and reproduction has been proven over and over through our various behavioral patterns. Let's retrograde and explore what are some exciting concepts that have been performed by humans before us and how did it occur. Almost every organism has the tendency to react to certain stimuli for survival. This reaction to each and every situation has an evolutionary basis of adaptation. The study of human emotions dates back to the 19<sup>th</sup> century and Psychologists have since then discovered many reasons for every emotion, yet these are just theories.
