

M.Sc. (Geology) (NEP Pattern) Semester-I
NEP-53 / PSCGEOT03 - Paper-III - Metamorphic Petrology and Geological Mapping

P. Pages : 2

Time : Three Hours

GUG/S/25/15105

Max. Marks : 80

-
1. Describe in detail factors controlling metamorphism.

OR

Write notes on the following.

- a) Contact metamorphism.
- b) Hydrothermal metamorphism.
- c) Protolith types.
- d) Retrograde metamorphism.

2. Describe in detail metamorphic facies.

OR

Write notes on the following.

- a) Granitization.
- b) Metamorphic differentiation.
- c) Tectonic controls of metamorphism.
- d) Metasomatism.

3. Describe in detail mineralogical phase rule for closed systems.

OR

Write notes on the following.

- a) ACF diagram.
- b) AFM diagram.
- c) Fugacity.
- d) Gibbs free energy.

4. Describe detailed mapping methods in metamorphic terrains.

OR

Write notes on the following.

- a) Base maps.
- b) Topographic maps.
- c) Objective of geological mapping.
- d) Precision required in geological mapping.

5. Write short notes on the following.

- a) Porphyroblastic texture.
- b) Xenolith.
- c) Metamorphic zones.
- d) Eclogite.
- e) Enthalpy.
- f) Activity of metamorphic reactions.
- g) Types of geological maps.
- h) Types of geological sections.
